# contractual obligation

<https://goo.gl/bx2EVn>

# RRDtool

[github.com/oetiker/rrdtool-1.x](https://github.com/oetiker/rrdtool-1.x)

<https://goo.gl/bx2EVn>

```
rrdtool create  
--source and --template
```

<https://goo.gl/bx2EVn>

```
CDEF:mtotal=rate,STEPWIDTH,*,\  
    NEWMONTH,PREV,0,IF,ADDNAN
```

```
RRDs::fetch_cb_register
```

```
DEF:a=cb//mykey:a:AVERAGE
```

# RrdGraphJS (lib)

[github.com/oetiker/RrdGraphJS](https://github.com/oetiker/RrdGraphJS)

<https://goo.gl/bx2EVn>

[github.com/oetiker/RrdGraphJS](https://github.com/oetiker/RrdGraphJS)

[tobi.oetiker.ch/smokenav](https://tobi.oetiker.ch/smokenav)

demo

<https://goo.gl/bx2EVn>

github.com/oetiker/RrdGraphJS

```
q( '.graph' ).rrdGraphPng();
```

```
<img class="graph"  
  data-src-template="grf/{{start}}/{{end}}"  
>
```

# Net::LDAP::SPNEGO (lib)

[github.com/oetiker/net-ldap-spnego](https://github.com/oetiker/net-ldap-spnego)

<https://goo.gl/bx2EVn>

[github.com/oetiker/net-ldap-spnego](https://github.com/oetiker/net-ldap-spnego)

Use an SSO login info from a Windows web browser to authenticate an ActiveDirectory LDAP connection

<https://goo.gl/bx2EVn>

# AcmeFetch (tool)

[github.com/oetiker/acmefetch](https://github.com/oetiker/acmefetch)

<https://goo.gl/bx2EVn>

[github.com/oetiker/acmefetch](https://github.com/oetiker/acmefetch)

Generate and manage  
Let's Encrypt! certificates  
without magic and sudo  
access.

<https://goo.gl/bx2EVn>

# LogFetcher (tool)

[github.com/oetiker/LogFetcher](https://github.com/oetiker/LogFetcher)

<https://goo.gl/bx2EVn>

[github.com/oetiker/LogFetcher](https://github.com/oetiker/LogFetcher)

# Highly scaleable Logfile collection via SSH

<https://goo.gl/bx2EVn>

# Mojolicious::Plugin::Pingen

[github.com/oetiker/mojolicious-plugin-pingen](https://github.com/oetiker/mojolicious-plugin-pingen)

<https://goo.gl/bx2EVn>

[github.com/oetiker/mojolicious-plugin-pingen](https://github.com/oetiker/mojolicious-plugin-pingen)

Printing and sending actual  
physical letters from a nice  
little RestAPI.

<https://goo.gl/bx2EVn>

# upload-service

[github.com/oetiker/upload-service](https://github.com/oetiker/upload-service)

<https://goo.gl/bx2EVn>

[github.com/oetiker/upload-service](https://github.com/oetiker/upload-service)

[tobi.oetiker.ch/upload](https://tobi.oetiker.ch/upload)

<https://goo.gl/bx2EVn>

[github.com/oetiker/upload-service](https://github.com/oetiker/upload-service)

A simple resumable  
web-inbox.

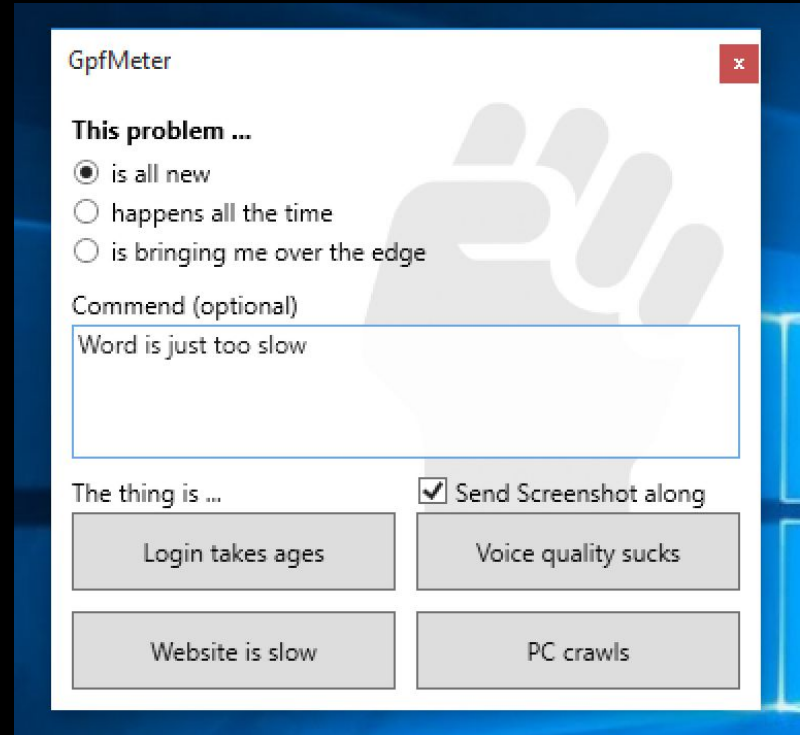

<https://goo.gl/bx2EVn>

# GpfMeter

[github.com/oetiker/GpfMeter](https://github.com/oetiker/GpfMeter)

<https://goo.gl/bx2EVn>

Track elusive performance problems on the Windows Desktop by enlisting the Users help.

# sourcey-buildpack

[github.com/oetiker/sourcey-buildpack](https://github.com/oetiker/sourcey-buildpack)

<https://goo.gl/bx2EVn>

[github.com/oetiker/sourcey-buildpack](https://github.com/oetiker/sourcey-buildpack)

A generic Buildpack for  
Cloud Foundry PAAS.

Get control over the environment  
for your applications.
