Goals and mission

- To support the integration of IPv6 in Switzerland

- To connect all interested Swiss parties, organizations and institutions with each other and with the resources of international groups and forums

- To achieve these goals we realize projects and organize different types of events for our members

How we are organized

- **Sponsors and Benefactors** support the Council with financial and human resources

- The **steering committee** defines the strategy of the council. It is formed by the founding members and the sponsors.

- The **core team** realizes the projects and event activities. It may create project groups for specific projects (such as education as an example).

SWISS IPv6 COUNCIL

What we wish from our members

- Active participation in the communication and at events
- Sharing of information among each other
- Participation in project groups
- Creating awareness wherever you are
  (have you turned on IPv6 on anything today? – quote by Gert)

- Please use the Council as a plattform –
  we can share information and experience instead of struggling for ourselves
