Feedback from RIPE-77

Some news with operational implication

SwiNOG#34 - October 30th 2018

abuse-c periodic check

- attribute introduced with RIPE-705: validation every year
- the normal validation is non-intrusive
- if it fails, RIPE-NCC sends an e-mail with a link
- if nothing comes back, RIPE-NCC starts asking the LIR, etc.
- pilot on some LIR and end users: 18% invalid
- if the customer requests clarifications, please redirect to

https://labs.ripe.net/Members/angela_dallara/how-we-will-be-validating-abuse-c

Legal addresses in the RIPE DB

- Europol proposal (2018-05): add legal addresses of Internet number resource holders into the RIPE DB

- besides the "role:" object, there should be some reference for law-related business

- strong objections were raised at RIPE-77:
  - Who is responsible to enter and keep accurate data?
  - Legal implications
  - …

- discussion within the **NCC services** working group

Automatic cleanup of RIPE-NONAUTH objects with RPKI data

- creation of new RIPE-NONAUTH objects is not allowed
- proposal (2018-06): if a RIPE-NONAUTH "route(6):" object also has an encompassing RPKI registration, it is automatically deleted from the RIPE DB, regardless of the maintainer
- no consensus at RIPE-77: the authors will work on a new draft
- discussion within the **Routing** working group
- encourage customers with RIPE-NONAUTH to set up a clean registration
